JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

furnished by the president of the Louisiana State board of health, viz : Smallpox, 248 cases, 22 white, 226 colored; remaining on hand May 1, 202 cases, 20 white, 182 colored, of which 189 were in the pesthouse and 13 in 11 quarantined houses; diphtheria, 17 cases, 14 white, 3 colored; scarlatina, 10 cases, all white; deaths, smallpox, 92, all colored; diphtheria, 3, all white. No deaths from scarlatina.

Very respectfully,

HENRY W. SAWTELLE,
Surgeon, U. S. M. H. S.

Smallpox in Tennessee.

NASHVILLE, May 6, 1896.

SIR: Following is a statement of the occurrence of smallpox in Tennessee for the month ending April 30: In the city of Memphis, Shelby County, there occurred 6 cases of smallpox, all colored; in Shelby County (outside of the city of Memphis), 11 cases; 2 white and 9 colored, with 3 deaths. Two cases were reported from Covington, Tipton County; also 1 other case reported from Cedar Point, making a total of 3 cases in Tipton County, all colored. In Jackson, Madison County, 1 case was discovered in the person of a negro man, porter on passenger train running between Jackson, Tenn., and Cairo, Ill.; thus making a total of 21 cases (2 white and 19 colored), with 3 deaths, in the State for the month. The usual precautions of vaccination, isolation, and disinfection were observed. The disease is rapidly abating.

Very respectfully,

J. BERRIEN LINDSLEY,
Secretary and Executive Officer, State Board of Health.

Arrival of steamship Patria with 1 case of variola on board.
